

Actian ZEN 15 Enterprise Server Upgrade von v14 35 User inkl. Backup Agent Download Multiplattform, Englisch

Artikelnummer 999355466
Gewicht 1kg
Länge 1mm
Breite 1mm
Höhe 1mm

Produktbeschreibung

Actian ZEN 15 Enterprise Server

Produktbeschreibung:

The Embedded Database Developers Choose

Edge applications and devices increasingly rely on AI to improve automation and decisions – human and machine – in stand-alone, peer-to-peer, local network, cloud and hybrid environments. The underlying edge data management must leverage a variety of hardware architectures, operating environments, networks, communications interfaces, and programming and scripting languages for applications that use these resources. Zen Edge Data Management delivers against these broad and demanding requirements.

Simplicity

Single, secure, scalable architecture supports concurrent read and write, using NoSQL and SQL across popular embedded environments

Speed

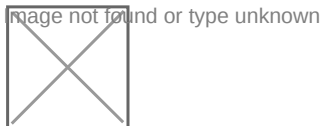

Faster than leading purpose-built databases at time-series, JSON-based or Blob document stores, and SQLite

Security

Provides data encryption for data at rest and in transit

Synchronization

Avoid ETL between devices, gateways, branch and cloud environments – improve speed, lower integration cost, and remove security vulnerabilities

Systemvoraussetzungen:

Ausführliche Systemanforderungen finden Sie [hier](#).
