Produktbeschreibung:

Crucial 8 GB DDR4-2666 UDIMM The fast, easy way to improve your desktops performance Theres an easy cure for a slow computer: more memory.

Designed to help your system run faster and smoother, Crucial® Desktop Memory is one of the easiest and most affordable ways to improve your systems performance. Load programs faster. Increase responsiveness. Run data-intensive applications with ease, and increase your desktops multitasking capabilities.

Make everything on your computer faster Memory is a component in your computer that allows for short-term data access.

Since your systems moment-to-moment operations

Since your systems moment-to-moment operations rely on short-term data access loading applications, browsing the Web or editing a spreadsheet the speed and amount of memory in your system plays a critical role.

Load apps in seconds by increasing the speed of your memory and installing more of it.

Multitask with ease If youre like us, you use your computer to do a lot of things at once.

You might be editing a document, while also looking at pictures and browsing the Internet.

This naturally leads to a performance problem: every app youre running requires memory and competes for a limited pool of resources.

Overcome this by installing high-density modules in each memory slot for seamless multitasking.

Install with ease no computer skills required

With just a screwdriver,

your owners manual, and a few minutes of time, you can install memory no computer skills necessary. Just watch one of our three-minute install videos, and well walk you step-by-step through the process. Dont pay a computer shop to do something you can do in minutes! Maximize the value of your system At a fraction of the cost of a new system, a memory upgrade is one of the most affordable ways to increase performance. Get more out of your desktop by giving it the

resources it needs to perform.

Micron® quality a higher level of reliability. As a brand of Micron, one of the largest memory manufacturers in the world,

Crucial Desktop Memory is the standard for reliable performance. From the original SDRAM technology all the way to DDR4, weve engineered the memory technologies that have powered the worlds computers for 40 years and counting. When you choose Crucial memory, youre choosing memory thats backed by a limited lifetime warranty and designed for the worlds leading systems.1

Dont settle for anything less.
